

Model Name	ZEQUO 2300	Product Specification	401-26241K-SG-SP03
Model No.	PN26241K-SG		Page 1 of 13
<p>1. Summary</p> <p>The ZEQUO 2300 is a Layer 2 all giga Ethernet Switch equipped with management functions that has 28 10/100/1000BASE-T ports and 4 SFP expansion ports.</p> <p>2. Feature</p> <p>(1) Ports 1 to 28 are 10BASE-T/100BASE-TX/1000BASE-T ports corresponding to auto negotiation. Also their speed and communication mode can be switched by configuration. However, ports 25 to 28 do not support half-duplex mode.</p> <p>(2) Ports 25 to 28 are SFP+ extension slots. These ports and the 1000BASE-T twisted pair cable ports cannot be used simultaneously.</p> <p>(3) Settings and firmware can be changed and saved by using an SD card.</p> <p>(4) All twisted pair ports support straight/cross cable auto sensing function. Simply connect devices with straight cables, whether it is a terminal or a network device. (To prevent loop failures, ports 1 to 24 are fixed to MDI-X at factory default settings.)</p> <p>(5) The connection status for each port is detected by the power saving mode, and it can suppress the power consumption to required volumes when not linked up. (Factory default: deactivated)</p> <p>(6) Due to the loop detection/shutoff function, a port where loop has occurred can be automatically shut off to prevent loop failures. When a port is shut off and recovered automatically, SNMP trap can be sent to notify the incident to the administrator. Moreover, the port with a loop can be identified by loop notification on the LEDs on the main unit and referring the history of loop on the setting screen.</p> <p>(7) The IEEE802.1p compatible QoS function is supported.</p> <p>(8) Equipped with energy efficient Ethernet (EEE) conforming to IEEE802.3az (LPI). When there is no data transmission at link up, the energy-saving state automatically starts so that power consumption can be reduced on each port.</p> <p>(9) Supports triple authentication that can simultaneously wait on IEEE802.1X authentication, MAC authentication, and WEB authentication via one port, and an authentication network which is matched to the kinds of connection terminals can be constructed.</p> <p>(10) Equipped with step authentication functions, and can prevent illegal access of the terminals.</p> <p>(11) The Ring Redundant Protocol (RRP) is supported, allowing to make a redundant network via ring topology.</p>

3. Rated/Environmental Conditions

3-1. Power supply	AC100-240V, 50/60Hz, 0.6A (with a built-in power supply)
3-2. Power consumption	Normally, Max.22.4W, Min.11.6W
3-3. Operating environment	Temperature: 0 - 50°C Humidity: 20 - 80%RH (no condensation)
3-4. Storage environment	Temperature: -20 - 70°C Humidity: 10 - 90%RH (no condensation)
3-5. EMC compliance	CISPR 32 Class A EN 55032 Class A AS/NZS CISPR32 Class A VCCI Class A EN 61000-3-2, EN 61000-3-3 EN 55024 IEC 61000-4-2, IEC 61000-4-3, IEC 61000-4-4, IEC 61000-4-5, IEC 61000-4-6, IEC 61000-4-8, IEC 61000-4-11
3-6. Safety compliance	IEC 62368-1 EN 62368-1
3-7. Environment compliance	RoHS compliant

4. Form

4-1. Form and materials/colors	Dimensions : 44mm (Height) × 440mm (Width) × 312mm (Depth) (Excluding protruding sections) Case material : Main unit: SECC, Front face: PC/ABS, Face plate: PC Color : Main unit: Green 03, Front face: Black 02, Face plate label: Black 01
4-2. Mass (Weight)	3,900 g

6. Software Specifications

6-1. Configuration	Control parameters can be set by the following procedures: (1) Configuration from an asynchronous terminal connected to the console port. (2) Configuration from a remote terminal connected via TELNET and SSH. (3) It can be set from a remote terminal according to the Web screen.
6-2. Ethernet Switch Control	ZEQUO assist Plus can confirm the management/operation status of Ethernet Switch. Ethernet Switch can be controlled by the following procedures: (1) Control from an asynchronous terminal connected to the console port. (2) Control from a remote terminal using SSH/TELNET and TCP/IP network connection. (3) Control using SNMP Manager The Ethernet Switch operation status can be checked using the following functions. (1) Internal temperature sensor function (2) Function to display the CPU usage and memory usage (3) SFP module status checking function (DDM: Digital Diagnostic Monitoring) (4) Twisted pair cable diagnostic function
6-3. System reboot	The system can be reset from the software in the following three modes: (1) Warm start. (2) Reset back to the factory default settings.
6-4. Agent	Management protocol : SNMP v1/v2c/v3 (RFC 1157, RFC 1901, RFC 1908, RFC 3411, RFC 3414) TELNET (RFC 854) SSH v2 (RFC 4251, RFC 4252, RFC4253, RFC 4254) SNTPv3 (RFC 1769) Data transfer protocol : TFTP (RFC 783, RFC 1350)
6-5. Support MIB	RFC1213-MIB (MIB II) (RFC 1213) (※1) BRIDGE- MIB (RFC 4188) (※2) SNMPv2-MIB (RFC 1907) RMON-MIB (RFC 2819) only etherStatsTable SNMP-FRAMEWORK-MIB (RFC 2571) SNMP-MPD-MIB (RFC 2572) SNMP-NOTIFICATION-MIB (RFC 2573N) SNMP-TARGET-MIB (RFC 2573T) SNMP-USER-BASED-SM-MIB (RFC 2574) SNMP-VIEW-BASED-ACM-MIB (RFC 2575) SNMP-COMMUNITY-MIB (RFC 2576) IP MIB (RFC 4293) (※3) IF-MIB (RFC 2863) excluding IfMIB IEEE8021-PAE-MIB excluding dot1xPaeSupplicant *1 Excluding following item At , ipRouteTable, icmp, egp *2 Excluding following item dot1dStp, dot1dSr, dot1dStatic *3 Excluding following item ipDefaultRouterTable, ipv6RouterAdvertTable
6-6. Log	Maximum number to be kept: 10,000 Transfers system logs to the Syslog server (IPv4 / v6)

7. Layer 2 Switching Functions

7-1. Spanning Tree	IEEE 802.1D Spanning Tree Protocol, Rapid Spanning Tree Protocol IEEE 802.1s Multiple Spanning Tree Protocol BPDU guard
7-2. VLAN	IEEE802.1Q Private VLAN MAC-based VLAN Subnet based VLAN Protocol-based VLAN Asymmetric VLAN Voice VLAN (LLDP-MED) Dynamic VLAN Guest VLAN Number of VLAN registrations: 4,094 (including default)
7-3. Link aggregation	IEEE802.3ad link aggregation function (LACP/STATIC) Up to 14 groups can be created (up to 8 ports per group).
7-4. SPAN, RSPAN	Subject port traffic can be copied and transmitted to designated ports (multiple subject ports can be designated) Remote switching packets can be monitored via RSPAN
7-5. Multicast	IGMP snooping (IGMPv1/v2/v3) function. (can be up to 1,024 groups of registration) IGMP Querier function MLD snooping (MLDv1/v2) function. (can be up to 1,024 groups of registration,) Multicast filtering function
7-6. QoS	IEEE802.1p 8 levels of Priority Queue supported Scheduling Method: Strict Priority Queuing (SPQ: Strict priority queuing) Weighted Round Robin (WRR: Weighted round robin scheduling) Weighted Deficit Round Robin (WDRR: Weighted Deficit Round Robin scheduling)
7-7. Authentication Function	IEEE802.1X Port-based authentication Mac-based authentication using IEEE 802.1X Dynamic VLAN function using IEEE 802.1X Guest VLAN using IEEE 802.1X (EAP-MD5/TLS/PEAP Authentication method) Force Authorized MAC Address Configuration EAP Packet Forwarding function (Enable/disable EAP transmission can be specified for each port.) MAC authentication WEB authentication Triple authentication (*1) Step authentication (*2) *1 IEEE802.1X MAC-based/MAC/WEB authentication can be simultaneously put into standby via 1 port *2 2 authentications can be combined in phases MAC-WEB authentication MAC-802.1X authentication 802.1X-WEB authentication
7-8. Access Control	Access control can be controlled by the following parameters: (1) IP address (Source or Destination) (2) IPv6 address (Source or Destination) (3) MAC address (Source or Destination) (4) TCP/UDP port number (Source or Destination) (5) VLAN ID (6) IEEE 802.1p Priority (7) DSCP (8) Protocol (9) ICMP type (10) TCP SYN Flag

12. Prohibitions when Using the Product to Guarantee Safety

Denotes that “Death or serious injuries might be sustained”.

The manufacturer assumes no responsibility for any problems occurring when the following conditions are not satisfied. Observe the following items when using the product.

- (1) Do not use power supply other than AC 100 - 240 V.
Deviation could lead to fire, electric shock, and/or equipment failure.
- (2) Do not handle this Ethernet Switch and connection cables during a thunderstorm.
Deviation could lead to electric shock.
- (3) Do not disassemble and/or modify this Ethernet Switch.
Deviation could lead to fire, electric shock, and/or equipment failure.
- (4) Do not damage the power cord. Do not bend too tightly, stretch, twist, bundle with other cord, pinch, put under a heavy object and/or heat it.
Damaged power cord could lead to fire, short, and/or electric shock.
- (5) Do not unplug nor plug in the power plug with wet hands.
Deviation could lead to electrical shock, and/or equipment failure.
- (6) Do not insert, nor drop any foreign objects such as metal or readily combustible things into the inside through the openings.
Deviation could lead to fire, electric shock, and/or equipment failure.
- (7) Do not store or use the Ethernet Switch in places where it might get splashed with liquids such as water, in places with a lot of humidity, in places with conductive dust, or in places where there are corrosive and combustible gases.
Deviation could lead to fire, electrical shock, and/or equipment failure.
- (8) Do not use the Ethernet Switch in dusty environments such as on floors, underneath floors, the backside of ceilings, or boards. Do not use the Ethernet Switch in very dusty areas such as on floors, underneath floors, the backside of ceilings, or boards.
Deviation could lead to fire, electrical shock, and/or equipment failure. It is recommended that the Ethernet Switch be operated in environments such as the inside of racks where it is difficult for dust to be generated.
- (9) Do not store or use the Ethernet Switch in places where it will be exposed to direct sunlight or high temperatures.
The temperature inside will rise, which may cause fire.
- (10) Do not store or use the Ethernet Switch in places where there are lots of vibrations and impacts, or in unstable areas.
It might fall, which may cause injuries and/or equipment failure.
- (11) Do not put the Ethernet Switch into fire.
Deviation could lead to explosion and/or fire.
- (12) Do not connect any other devices except for 10BASE-T/100BASE-TX/1000BASE-T devices to the twisted pair ports.
Deviation could lead to equipment failure.
- (13) Do not insert any other modules except for our optional SFP module (PN54022-SG/PN54024-SG) to the SFP extension slots.
Check out our website for the latest information on supported SFP modules.

Date issued	Jun. 5, 2020	Panasonic Electric Works Networks Co., Ltd.
Date revised	Apr. 1, 2022	

Model Name	ZEQUO 2300	Product Specification	401-26241K-SG-SP03
Model No.	PN26241K-SG		Page 12 of 13

13. Cautions when Using the Product to Guarantee Safety

Denotes that “Minor injuries might be sustained, or property damage might occur”.

The manufacturer assumes no responsibility for any problems occurring when the following conditions are not satisfied. Observe the following items when using the product.

- (1) Be sure to check the precautions which are printed on the product labels before using.
Deviation could lead to electric shock.
- (2) Use the bundled power cord (AC 100 - 240 V specifications).
Deviation could lead to electric shock, malfunction, and/or equipment failure.
- (3) Unplug the power cord in case of equipment failure.
Deviation, such as keeping connected for a long time, could lead to fire.
- (4) Be sure to connect the ground cable.
Otherwise this might cause electrical shocks, misoperations and malfunctions.
Connect the Ethernet Switch via the supplied power cord to the outlet which is connected to the ground.
If the outlet is not connected to a ground, connect the ground cable to the ground terminal screw.
- (5) Connect the power cord firmly to the power port.
Deviation could lead to electric fire, shock, and/or malfunction.
- (6) If the STATUS LED is blinking orange, check for the cause via the system log, since it might be a malfunction if it is not the temperature, loop detection and shutoff, unplug the power plug.
Deviation, such as keeping connected for a long time, could lead to fire.
- (6) Handle the Ethernet Switch carefully so that fingers or hands may not be damaged by twisted pair port, SFP extension slot, console port, SD card slot, or power cord hook block.
- (7) Check whether the optical fiber cable connectors are contaminated with dust, etc.
This might cause the optical signal to not be transmitted normally, and cause misoperations and malfunctions. If they are contaminated, make sure to clean them off, then connect them to the optical fiber ports.
- (8) This Ethernet Switch is to be periodically serviced in order to maintain its performance.
Please choose a product administrator, and have them be sure to implement periodic maintenance. When doing maintenance, check the inspection chart that is posted on our website which has the requisite items listed on it.
- (9) When using this Ethernet Switch to design systems, use it after applying appropriate measures such as setting up redundant configurations.
Communications failures might be generated due to causes such as malfunctions or misoperations while the Ethernet Switch is being used.
- (10) When using this Ethernet Switch for applications which require extremely high reliability, be careful to expend all possible means to ensure safety and reliability.
This Ethernet Switch was not designed nor manufactured with the intention that it be used for applications (in use with railways, aviation, and medical care, etc. whereas the influence rate due to communications failures is extremely high in regard to systems that directly affect systems and human lives) which require extremely high reliability.
- (11) It is recommended that this Ethernet Switch be replaced about five years after it has been installed.
This may vary depending upon conditions such as utilisation rates and usage environments, but performance might decrease due to the age-related degradation, etc. of components.
- (12) Be careful in regards to environmental restrictions whereby the Ethernet Switch can be used.
Please isolate the business power lines and communications lines. Isolate distribution lines and other distribution lines, and low current power lines, optical fiber cables, metallic water conduits, and gas conduits, etc. Noise may be generated in the communications lines which might cause communications glitches.
- (13) Do not connect the console ports with any other device except for serial communication terminal.
Deviation could lead to equipment failure.

Model Name	ZEQUO 2300	Product Specification	401-26241K-SG-SP03
Model No.	PN26241K-SG		Page 13 of 13

14. Basic Instructions for the Use of This Product

- (1) For inspection and/or diagnosis, consult the shop.
- (2) Use commercial power supply from a wall socket, which is close and easily accessible to this Ethernet Switch.
- (3) Unplug the power cord when installing or moving this Ethernet Switch.
- (4) Unplug the power cord when cleaning this Ethernet Switch.
- (5) Use this Ethernet Switch within the specifications. Deviation could lead to malfunction.
- (6) Do not touch the metal terminal of the RJ45 connector, the modular plug of connected twisted pair cable, or the metal terminal of the SFP extension slot. Do not place charged objects in the proximity of them. Static electricity could lead to equipment failure.
- (7) Do not put the modular plug of the connected twisted pair cable on objects that can carry static charge, such as carpet. Do not place it in the proximity. Static electricity could lead to equipment failure.
- (8) Do not put a strong shock, including dropping, to this Ethernet Switch. Deviation could lead to equipment failure.
- (9) Before connecting a console cable to the console port, discharge static electricity, for example by touching metal appliance (do not discharge by touching this Ethernet Switch).
- (10) Do not store and/or use this Ethernet Switch in the environment with the characteristics listed below.
(Store and/or use this Ethernet Switch in the environment in accordance with the specification.)
 - High humidity. Possible spilled liquid (water).
 - Dusty. Possible static charge (such as carpet).
 - Under direct sunlight.
 - Possible condensation. High/low temperature exceeding the specifications environment.
 - Strong vibration and/or strong shock.
- (11) Please use this Ethernet Switch in place where ambient temperature is from 0 to 50° C.
Failure to meet the above conditions may result in fire, electric shock, breakdown, and/or malfunction.
Please take notice because such cases are out of guarantee.
Additionally, do not cover the bent hole of this Ethernet Switch.
Deviation could lead to high internal temperature, equipment failure and/or malfunction.
- (12) When using two Ethernet Switches, do not stack them. When you place them side by side, allow for a space of 20 mm or more between them.
- (13) Operation is not guaranteed if a module other than the optional SFP extension modules (PN54022-SG/PN54024-SG) is inserted into the SFP extension slot.
For the latest information about compatible SFP extension modules, check our website.
- (14) Select the appropriate cables and lay them.
Communications might be affected by how the cables are laid, and environmental noise.
