Model Name	Switch-M48eG	D 1 + C 'C +	401-28480K-SG-SP03
Model No	PN28480K-SG	Product Specification	Page 1 of 10

1. Summary

Switch-M48eG is an all Giga bit Ethernet Ethernet Switch equipped with eight 10BASE-T/100BASE-TX/1000BASE-T ports and one SFP extension slot with a management function.

2. Feature

- (1) Has wire-speed Layer 2 Switching function.
- (2) Has a loop detection function, which notifies when a loop occurs with the corresponding port LED and automatically shuts down the looped port. In addition, when a port is shut down and when it automatically recovers, an SNMP trap can be sent to notify the administrator.
- (3) Has a loop detection history function, which notifies when a loop occurs with the corresponding LED and enables a network administrator to identify the looped port after the loop is removed.
- (4) Embedded power saving mode detects the connection status automatically and saves power consumption to minimum.
- (5) Use of LED indicator switching button saves power consumption of LED lamps.
- (6) Ports 1 to 48 are auto negotiation-ready 10/100/1000BASE-T ports. Their speed and communication mode can be changed by configuration.
 - Ports 45-48 can be used as a 10/100/1000BASE-T port corresponding to auto negotiation or an SFP extension slot exclusively.
- (7) All twisted pair ports support straight/cross cable auto sensing function. Simply connect devices with straight cables, whether it is a terminal or a network device. (This function does not work if the port communication configuration is set at Fixed or Link Aggregation. Ports 1 to 44 are set at MDI-X. (default))
- (8) VLAN function allows free grouping of up to 256 VLANs.
- (9) The IEEE802.1p compatible QoS function is supported.
- (10) Has an Internet Mansion function, which ensures security between each door.
- (11) Has a port grouping function, which groups ports that are allowed to communicate with one another to limit communications between different groups.
- (12) Equipped with energy efficient Ethernet (EEE) conforming to IEEE802.3az (LPI). When there is no data transmission at link up, the energy-saving state automatically starts so that power consumption can be reduced on each port.
- (13) The IEEE802.1X compatible user authentication function (EAP-MD5/TLS/PEAP) is supported.
- (14) Supports ZEQUO assist Plus. Processes from introduction to maintenance can be performed easily.

3. Rated/Environmental Conditions

3-1. Power supply	AC100-240V, 50/60Hz, 1.5A (with a built-in power supply)		
3-2. Power consumption	Normally, Max: 34.6W, Min: 13.4W		
3-3. Operating environment	Temperature: 0 - 50℃ Humidity: 20 - 80%RH (no condensation)		
3-4. Storage environment	Temperature: -20 - 70°C Humidity: 10 - 90%RH (no conden-	sation)	
3–5. Immunity	ESD Radiated EFT/Burst Surge Conducted Power frequency magnetic field Voltage dips and interruptions	:IEC61000-4-2 (10kV) :IEC61000-4-3 Level2 :IEC61000-4-4 Level3 :IEC61000-4-5 Level4 (AC line) :IEC61000-4-6 Level2 :IEC61000-4-8 Level4 :IEC61000-4-11	

4. Form

4-1. Form and materials/colors	Dimensions Case material Color	:44mm (Height) ×440mm (Width) ×322mm (Depth) (Excluding protruding sections) :SECC : Main unit: Green 03, Front face: Black 03, Face plate label: Black 04
4-2. Mass (Weight)	4,200g	

5. Hardware Specifications

5-1. Interface	Twisted pair port 1-48	:RJ45 connector (*1)	
	Transmitting and receiving network system:		
		IEEE802.3 10BASE-T	
		IEEE802.3u 100BASE-TX	
		IEEE802.3ab 1000BASE-T	
	Transmission speed	:10/100Mbps, full/half duplex	
		:1000Mbps, full duplex	
	Compatible cable	:Twisted pair cable	
		(At least equivalent to EIA/TIA568 category 5e	
	Maximum transmission distance	:100m	
	Auto-Negotiation	:Communication speed and full/half duplex are	
		automatically recognized.	
		The setting can be fixed to 10Mbps, 100Mbps and full duplex or half duplex.	
	*1 Embedded power saving mode detects the connection status automatically		
	and saves power consumption to minimum.		
	SFP extension slot 45-48		
	SFF-8472 (DMI: Diagnostic Monitoring Interface)		
	*Select either of RJ45 or SFP for use		
	Optional Accessories	:1000BASE-SX SFP Module (PN54021K-SG) 1000BASE-LX SFP Module (PN54023K-SG)	
5-2. Switching mode	Switching method	:Store and Forward	
	Switching capacity	:96Gbps	
	Packet transfer capability	:Non-blocking	
		Max 1,488,000pps/port (1000Mbps)	
		Max 148,800pps/port (100Mbps)	
		Max 14,880pps/port (10Mbps)	
	MAC Address table	:Max 16K entry/unit	
	Buffer memory	:1.5M Byte/unit	
	Flow control	:half-duplex Back pressure	
		full-duplex IEEE802.3x	
	Aging timeout	:10 to 1,000,000 sec. (Default: 300 sec.)	
	Jumbo frame supported	:9KB	
	Transmittable frames	:EAP,BPDU

6. Software Specifications

6-1. Configuration	Control parameters can be set by the following procedures: (1) Configuration from an asynchronous terminal connected to the console port. (2) Configuration from a remote terminal connected via TELNET and SSH.		
6-2. Ethernet Switch Control	Ethernet Switch can be controlled by the following procedures: (1) Control from an asynchronous terminal connected to the console port. (2) Control from a remote terminal using SSH/TELNET and TCP/IP network connection (3) Control using SNMP Manager The Ethernet Switch operation status can be checked using the following functions. (1) Function to display the CPU usage and memory usage (2) SFP module status checking function (DDM: Digital Diagnostic Monitoring)		
6-3. Rebooting	The system can be reset from the software in the following three modes: (1) Warm start (2) Reset to factory default (3) Reset items other than the IP address to factory default The reboot timer function can also be used in each mode.		
6-4. Supported Agent	Management protocol Data transfer protocol	:SNMP v1/v2c/v3 (RFC1157,RFC1901, RFC1908) TELNET (RFC854) SSH v2 (RFC4251,RFC4252, RFC4253,RFC4254) SNTP v3 (RFC1769) :TFTP (RFC783,RFC1350)	
6-5. Supported MIB	RFC1213-MIB (MIB II) BRIDGE-MIB SNMPv2-MIB RMON-MIB SNMP-FRAMEWORK-MIB SNMP-MPD-MIB SNMP-NOTIFICATION-MIB SNMP-TARGET-MIB SNMP-USER-BASED-SM-MIB SNMP-USER-BASED-ACM-MIB SNMP-COMMUNITY-MIB IP-MIB IF-MIB IEEE8021-PAE-MIB *1 Excluding following item At, ipRouteTable, icmp, egp *2 Excluding following item dot1dStp, dot1dSr, dot1dStation* *3 Excluding following item ipDefaultRouterTable, ipv6Rou		
6-6. System log	Maximum number to be kept: 256 System log transfer (IPv4/IPv6)

6. Software Specifications

6-7. Loop detection	Turns on the port LED with a orange light when a loop occurs in the corresponding port. At this time, the relevant port automatically shuts down to prevent loop from occurring. SNMP trap can be sent to notify the incident to the administrator. During loop is occurring, or if loop has occurred within the latest 3 days, LOOP HISTORY LED blinks to notify this.	
	 Loop detection setting Enabled (factory default setting) Enabled/disabled can be switched by configuring a setting using the console, or by pressing "LED DISPLAY CHANGE BUTTON" for 10 seconds or more. The setting is kept even when the power is turned OFF. Loop detection port Enabled: Ports 1 to 44 (factory default setting) Disabled: Ports 45 and 48 (factory default setting) Loop shutoff time 60 to 86400 sec. (Factory default setting: 60 sec.) The set time Port LED lights up orange and the port shuts off. Loop history retention time 3 days The LOOP HISTORY LED lamp flashes for three days. The Port LED lamp also remains lit for three days after the loop is eliminated. 	
6-8. Others	ZEQUO assist Plus Syslog Client (Transfers system logs to the Syslog server.) TFTP Client (Upgrades the software and saves/loads configuration information.) Login RADIUS (login authentication function by the RADIUS server)	

7. Layer 2 Switching Functions

7-1. Port grouping	Members of the port group can communicate only among member ports in the same group. (Number of group registrations: 256)		
7-2. VLAN	IEEE802.1Q Tag VLAN Protocol Port Base VLAN Number of VLAN registrations: 256 (including default) Internet Mansion function		
7-3. Trunking	IEEE802.ad Link Aggregation function (STATIC) Up to 8 groups can be created (up to 8 ports per group).		
7-4. Port Monitoring	Traffic of the target port can be copied to the specified port and transmitted. (Two or more target ports can be specified.)		
7-5. QoS	IEEE802.1p 4 levels of Priority Queue supported (Strict priority queuing)		
7-6. Authentication Function	IEEE802.1X Port-based authentication (EAP-MD5/TLS/PEAP Authentication method)		
7–7. Access control	(EAP-MD5/TLS/PEAP Authentication method) Access control can be controlled by the following parameters: (1) IP address (Source or Destination) (2) IPv6 address (Source or Destination) (3) MAC address (Source or Destination) (4) TCP/UDP port number (Source or Destination) (5) VLAN ID (6) IEEE 802.1p Priority (7) DSCP (8) Protocol (9) ICMP type (10) TCP SYN Flag

11. Prohibitions when Using the Product to Guarantee Safety

The manufacturer assumes no responsibility for any problems occurring when the following conditions are not satisfied. Observe the following items when using the product.

- Do not use power supply other than AC 100 240 V.
 Deviation could lead to fire, electric shock, and/or equipment failure.
- (2) Do not disassemble and/or modify this Switching Hub. Deviation could lead to fire, electric shock, and/or equipment failure.
- (3) Do not put foreign objects (such as metal and combustible) into the opening (such as twisted pair port, console port), and/or do not drop them into the inside of the Switching Hub. Deviation could lead to fire, electric shock, and/or equipment failure.
- (4) Do not connect equipments other than 10BASE-T/100BASE-TX/1000BASE-T to twisted pair port. Deviation could lead to fire, electric shock, and/or equipment failure.
- (5) Do not place this Switching Hub in harsh environment (such as near water, high humid, and/or high dust). Deviation could lead to fire, electric shock, and/or equipment failure.
- (6) Do not place this Switching Hub under direct sunlight and/or high temperature. Deviation could lead to high internal temperature and fire.
- (7) Do not handle the power cord with wet hand. Deviation could lead to electric shock, and/or equipment failure.
- (8) Do not handle this Switching Hub and connection cables during a thunderstorm. Deviation could lead to electric shock.
- (9) Do not damage the power cord. Do not bend too tightly, stretch, twist, bundle with other cord, pinch, put under a heavy object and/or heat it. Damaged power cord could lead to fire, short, and/or electric shock.
- (10) Do not install this Switching Hub at the location with continuous vibration or strong shock, or at the unstable location. Deviation could lead to injury and/or equipment failure.
- (11) Do not insert any modules other than the optional SFP modules (PN54021K-SG/PN54023K-SG) into the SFP extension slot. Deviation could lead to fire, electric shock, and/or equipment failure. For the latest information about compatible SFP extension modules, check our website.
- (12) Do not put this Switching Hub into fire.
 Deviation could lead to explosion and/or fire.
- (13) Do not use the supplied power cord for anything other than this product. Deviation could lead to fire, electric shock, and/or equipment failure.
- (14) Unplug the power cord in case of equipment failure. Deviation, such as keeping connected for a long time, could lead to fire.
- (15) Connect this Switching Hub to ground.

 Deviation could lead to electric shock, malfunction, and/or equipment failure.
- (16) Connect the power cord firmly to the power port.

 Deviation could lead to electric fire, shock, and/or malfunction.
- (17) Unplug the power cord if the STATUS/ECO LED (Status/ECO mode) blinks in orange (system fault). Deviation, such as keeping connected for a long time, could lead to fire.
- (18) Handle the Switching Hub carefully so that fingers or hands may not be damaged by twisted pair port, console port, or power cord hook block.

Date issued	May 26, 2015	Panasonic Electric Works Networks Co., Ltd.
Date revised	Apr 1, 2022	

Model Name	Switch-M48eG	D 1 (C 'C '	401-28480K-SG-SP03

12. Basic Instructions for the Use of This Product

- (1) For inspection and/or diagnosis, consult the retailer.
- (2) Use commercial power supply from a wall socket, which is close and easily accessible to this Switching Hub.
- (3) Unplug the power cord when installing or moving this Switching Hub.
- (4) Unplug the power cord when cleaning this Switching Hub.
- (5) Use this Switching Hub within the specifications. Deviation could lead to malfunction.
- (6) Do not touch the metal terminal of the RJ45 connector, the modular plug of connected twisted pair cable. Do not place charged objects in the proximity of them. Static electricity could lead to equipment failure.
- (7) Do not put the modular plug of the connected twisted pair cable on objects that can carry static charge, such as carpet. Do not place it in the proximity. Static electricity could lead to equipment failure.
- (8) Do not put a strong shock, including dropping, to this Switching Hub. Deviation could lead to equipment failure.
- (9) Before connecting a console cable to the console port, discharge static electricity, for example by touching metal appliance (do not discharge by touching this Switching Hub).
- (10) Do not store and/or use this Switching Hub in the environment with the characteristics listed below. (Store and/or use this Switching Hub in the environment in accordance with the specification.)
 - High humidity. Possible spilled liquid (water).
 - Dusty. Possible static charge (such as carpet).
 - Under direct sunlight.
 - Possible condensation. High/low temperature exceeding the specifications environment.
 - Strong vibration and/or strong shock.
- (11) Please use this Switching Hub in place where ambient temperature is from 0 to 50°C. Failure to satisfy the conditions above may result in a fire, electric shock, equipment failure, and/or malfunction. Such events are not covered by the warranty. Do not block the ventilator of the Switching Hub. Blocked ventilator induces the heat accumulation inside, causing equipment failure and/or malfunction.
- (12) When using two Switching Hubs, do not stack them. When you place them side by side, allow for a space of 20 mm or more between them. This space is not necessary if you use supplied connection brackets.
- (13) Operation is not guaranteed if a module other than the optional SFP extension modules (PN54021K-SG/PN54023K-SG) is inserted into the SFP extension slot.

For the latest information about compatible SFP extension modules, check our website.
